The days are shorter in the tropics. The nights are longer. People get tired. Just as the winter rolls in, spring rolls out. Now that we're officially in spring, we're thinking about spring travel. If you're like most, you're planning to go to Europe. Depending on where you're going, you'll need to plan ahead and know your European visa requirements. While you may need a visa to go to Europe, you also need to know the specifics to make sure you don't have to pay an exorbitant amount of money to get one. Why does one need a visa to travel to Europe? The short answer is that certain countries only issue visas to a select few people. Getting a visa for a trip to Europe isn't as easy as it is for some other countries. Why is that? For starters, not every country in Europe is a member of the Schengen Agreement. The Schengen Agreement is a free-travel zone that makes it easier for you to travel from one Schengen country to another, without needing a visa or passport stamp. In order to enter the EU Schengen zone, you'll need a passport and the proper visa, depending on the country you're visiting. For example, if you're visiting the UK, you'll need to have a passport and a visa. If you're entering Germany, you'll only need a passport and you won't need a visa. Countries are doing their best to make things easier for travelers entering the EU Schengen zone. The UK, for example, recently introduced rules that require citizens of the United Kingdom to have an e-visa
