Download EBOOK Mastering 'Metrics: The Path from Cause to Effect by Joshua D. Angrist Jorn Steffen for free[A comparative study of lung function measurements in patients with rheumatic diseases]. The aim of this study was to investigate changes in pulmonary function in rheumatic patients and to determine which of the parameters in these measurements are most useful. Between 1980 and 1990 we measured lung volumes, flow and diffusing capacity in 117 patients with rheumatic disease [90 with rheumatoid arthritis (RA) and 27 with systemic lupus erythematosus (SLE)]. The patients were divided into two groups according to their duration of disease: group 1 (duration 10 years, n = 66, RA group). The results were compared with a control group (n = 47) consisting of age- and sex-matched non-smokers with a mean age of 43 years. The maximum expiratory volume (FEV1) in group 1 was 634 +/- 110.2 ml, in group 2 789 +/- 134.9 ml, in the control group 705 +/- 128.7 ml (P We created the Endurance Fitness BodyWorks Ultimate System to be a complete, well-rounded solution to achieve your fitness goals and enjoy a healthier lifestyle. Our unique, body-weight based workout system is designed to help you gain both strength and endurance in just minutes a day. BodyWorks is great for everyone, but is especially good for those who have trouble working out
